

Occupational Health and Safety Policy and Documents

As Sertrans Logistics, in all activities related to our logistics services, in accordance with the conditions of the 18001 OHSAS Occupational Health and Safety;

- We create a healthy and safe working environment for all our stakeholders, especially our employees, and prevent possible work accidents and occupational diseases,
- We organize trainings in order to raise awareness of all our employees on occupational safety and health issues, we also work on raising awareness of other stakeholders,
- In order to ensure that all employees contribute to the system directly or via an employee representative when necessary; To establish a more applicable OHS System by using participation, consultation and notification method, to ensure the continuity of occupational safety within a proactive approach
- We make continuous improvements in order to identify potential hazards that our employees and other stakeholders may face, to eliminate and minimize risks,
- We develop methods to minimize losses in any accident or emergency,
- Sertrans's basic occupational health and safety policy is to establish, develop and continuously improve the OHS Management System in line with laws, regulations, other national and
- international standards.
